Installation contactors

A wide range of contactors take noise reduction to new levels

ABB's hum-free installation contactor designs now offer a wider range of ratings from 16 A to 100 A. Widely used in buildings for switching and controlling lighting, heating, ventilation, motor and pumps, the installation contactors take noise reduction to a new level. With an innovative AC / DC coil design that eliminates hum, a broad selection of common accessories as well as manual and automatic versions, installation contactors offer peace of mind in noise-sensitive applications.

Optimum interface

Quiet and reliable in every application

ABB's hum-free contactors feature innovative AC / DC coils. The range covers ratings from 16 A to 100 A and offers accessories to suit customer requirements in every application.

An integrated indicator makes diagnostics quicker and provides reliable information about the contactor's status at a glance.

Easy to install

Simple solution that saves time

Reduce installation time and stock levels, with a universal auxiliary contact block that can be attached to the contactors by hand.

Installation contactors fit easily with ABB's System Pro M compact range, making them fully compatible with other modular DIN-rail components.

Global availability

Whatever you need, wherever you need it

Installation contactors are available in single and multi-packs to meet different customer needs and to optimize warehousing space.

Every ABB product enjoys expert local support worldwide to make communication easier and delivery faster.

Installation contactors

Features and benefits

Noise-free operation

With an innovative AC / DC design that eliminates hum, the range meets the needs of applications demanding silent operation, for example hotel rooms and residential buildings.

Single and multi packaging

The right packaging for your needs- our products are available in a choice of different packaging and delivery quantities. This allows you to warehouse according to your needs and save up to 50% on your inventory.

Wide application range

The ESB installation contactors range meets both the industrial standard IEC 60947-4-1 and the household standard IEC 61095 as well as pollution degree class 3. Due to multiple certification and inherent robustness, the contactors can be used in 10% more applications in both residential and industrial settings.

Comprehensive solution

ABB's ESB and EN installation contactors range offers a complete solution from 16 A to 100 A, offering an answer to all customer needs from a single supplier.

With 16 A, 25 A and 100 A versions, tender specifications can be met with competitive pricing.

Installation contactors

Features and benefits

Save up to 15% space with group mounting

ESB16..N and ESB/EN20..N can be group mounted. There is no need for a distance piece between contactors, saving both valuable space in cabinets and money.

Built-in protective circuit

Protect the contactor without additional space-demanding components against remote lightning strikes and overvoltages.

Design in accordance with System Pro M

Contactors and accessories are designed according to System pro M range and ABB's modular DIN-rail components and fit in dedicated panels.

EAN-code for an easy identification

Just scan the EAN-code printed on the side of the devices and save up to 80% time identifying the product in your system. This way, handling and identifying your products in warehouse and cashier system is easy.

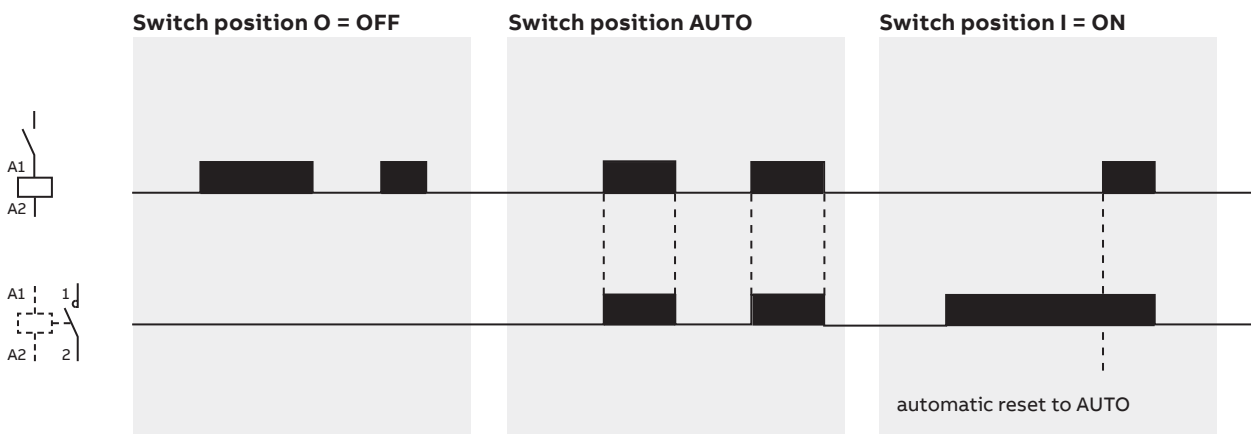

Installation contactors

Easy installation and maintenance

ABB's installation contactors come with many features that make installation and maintenance easier. The mechanical Indicator with green and red color for status indication ensures a quick diagnostic of the system. Also, some speciality types feature a manual override functionality with a toggle switch to control independently from control source. Accessories can be mounted tool-free on the contactor, for example auxiliaries, space holders as well as security and safety covers.

Installation contactors

Overview accessories

Tool-free accessories

Speed up installation and maintenance time by mounting accessories tool-free to the contactor. Auxiliaries, security safety covers and space holders are easily and quickly installed.

Distance pieces

If the ambient temperature in your control cabinet exceeds 40°C and the on-time is longer than an hour, you need to use a distance piece between each second contactor for the ESB25..N to ESB100..N.

Sealing covers

Protect the security of your employees/ customers' installation with sealing covers. They are available in different sizes and can be clipped on easily.

Auxiliary contact blocks

ABB's new range of auxiliary contact blocks are mounted on the left side of the contactors. Simply clip them on - no tools required! Valuable inventory space can be saved with the new auxiliary contact block which is designed to fit all contactors of the range.

ESB16..N installation contactors

ESB16..N

1SB6101551V0000

The ESB16..N installation contactors are used to control single-phase loads up to 16 A and can be operated by AC or DC voltages. These contactors are made for use in household applications as well as in industrial environment.

ESB16..N series is providing the following benefits:

- Hum-free operation, low power consumption and integrated overvoltage protection.
- Various contact combinations and accessories are available.

Lamp load table

Please note that switching lamps is a capacitor load application where high inrush current peaks could occur. These are influenced by the length and cross section of the wire as well as the type of power supply unit and specifications of the lamp brand. For example, long cables can increase the possible number of lamps per pole. The table shows the allowed max. current for one pole and considers already the startup current peaks.

The following selection table shows the current values and the maximum switchable capacitor load for compensated lamps. These two limits have to be considered in the selection of contactors.

	ESB16..N	ESB20..N EN20..N	ESB25..N EN25..N	ESB40..N EN40..N	ESB63..N	ESB100..N
Permitted compensating capacity per phase C_{max} [μF]	45	45	100	350	500	650
Lamp types	Maximum load of the current paths during switching of electric lamps I _e [A]					
Incandescent and halogen lamps (230 V)	3	3	7	20	30	45
Mixing lamps without ballast	3	3	7	20	30	45
Fluorescent lamps with conventional ballast						
single lamp uncompensated	18	18	22	36	56	90
single lamp parallel compensated	1.5	1.5	3.5	10	15	22
series compensation, duo circuit	18	18	22	36	56	90
Fluorescent lamps with electronic ballast or CFL	3	3	7	20	30	45
LED lamps	3	3	7	20	30	45
High pressure mercury-vapor lamps						
single lamp without compensation	9	9	11	18	28	45
single lamp with parallel compensation	1.5	1.5	3.5	10	15	22
Halogen metal-vapor lamps						
single lamp without compensation	9	9	11	18	28	45
single lamp with parallel compensation	1.5	1.5	3.5	10	15	22
High pressure sodium-vapor lamps						
single lamp without compensation	9	9	11	18	28	45
single lamp with parallel compensation	1.5	1.5	3.5	10	15	22
Low pressure sodium-vapor lamps						
single lamp without compensation	9	9	11	18	28	45
single lamp with parallel compensation	1.5	1.5	3.5	10	15	22

Example for lamp load calculation

Due to many varieties of lamps and ballasts we advice to take the current load as base for reference. The lamp table considers already the inrush peaks and other lamp parameters. Please see the following examples for a reliable project lamp calculation.

Fluorescent lamp with conventional ballast, uncompensated

the lamp operating current I = 1.5 A, voltage U = 230 V

1 pole of ESB25..N can be loaded with max. 22 A,

see lamp table => $22 \text{ A} / 1.5 \text{ A} = 14.66 \Rightarrow 14$ lamps

1 pole of ESB20..N can be loaded with max. 9 A,

see lamp table => $9 \text{ A} / 1.5 \text{ A} = 6$ lamps

Please use the referring value in the table stated above and divide it with the current stated on the lamp. This will lead to the number of lamps which can be switched.

Example with picture: ESB25..N used for LED lamps:

$7 \text{ A} (= 7000 \text{ mA}) / 85 \text{ mA} = 82.23 \Rightarrow 82$ lamps

Installation contactors

Voltage code table

⁽¹⁾ only coil 6 available with 230 V - 240 V for ESB25..N / EN25..N

⁽²⁾ only coil 7 available with 400 V - 415 V for ESB25..N / EN25..N

⁽³⁾ coil 8 not available for ESB16..N, ESB20..N / EN20..N
